

Training and Evaluation Outline Report

Task Number: 71-8-5701

Task Title: Develop the Airspace Control Appendix (Brigade-Corps)

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD1 - This training product has been reviewed by the training developers in coordination with the Fort Leavenworth foreign disclosure officer. This training product can be used to instruct international military students from all approved countries without restrictions.

Supporting Reference(s):

Step Number	Reference ID	Reference Name	Required	Primary
	FM 3-52	AIRSPACE CONTROL	Yes	Yes
	JP 3-52	JOINT DOCTRINE FOR AIRSPACE CONTROL IN THE COMBAT ZONE	Yes	No

Condition: The command receives a mission order from higher headquarters and the commander issues guidance on developing the airspace control appendix. The command establishes communications with subordinate and adjacent units, and higher headquarters. The mission command system is operational and processing information. Some iterations of this task should be performed in MOPP 4.

Standard: The staff develops and disseminates the airspace control appendix (Appendix 10 to Annex C (Operations)) in accordance with the commanders intent and standard operating procedures.

Safety Risk: Low

Task Statements

Cue: None

DANGER

Leaders have an inherent responsibility to conduct Risk Management to ensure the safety of all Soldiers and promote mission accomplishment.

WARNING

Risk Management is the Army's primary decision-making process to identify hazards, reduce risk, and prevent both accidental and tactical loss. All Soldiers have the responsibility to learn and understand the risks associated with this task.

CAUTION

Identifying hazards and controlling risks across the full spectrum of Army functions, operations, and activities is the responsibility of all Soldiers.

Remarks: None

Notes: None

TASK STEPS

1. The staff develops the airspace control appendix by:

a. Determining integrated airspace user requirements to:

- (1) Submit necessary airspace coordinating measures to higher headquarters.
- (2) Recommend risk guidance.
- (3) Recommend airspace priorities.

b. Developing airspace usage priorities:

- (1) Confirm commander's intent, guidance, and mission priorities.
- (2) Evaluate orders, directives, and concept of the operation.
- (3) Confirm commander's priority of airspace use.

c. Coordinating air traffic service, sensor emplacement, and data links:

- (1) Recommend emplacement of sensors and radars.
- (2) Integrate available air defense artillery.

d. Determining combat identification authority and procedures for airspace users:

- (1) Recommend inputs to area air defense plan.
- (2) Determine if higher echelons retain combat identification authority or whether to delegate to lower echelon.

e. Determining rules of engagement (ROE) and early warning procedures for air defense operations:

- (1) Recommend ROE for current and future operations within the unit area of operations (AO).
- (2) Establish liaison with air defense artillery fire control officers.
- (3) Establish procedures to process engagements.

f. Determining reporting requirements and monitoring methods for manual reporting:

- (1) Determine agencies operating in the AO who lack self-reporting capabilities and equipment identification.
- (2) Establish procedures to manually report.

g. Integrating airspace use within the area of operations.

- (1) Coordinate user requirements.
- (2) Plan for airspace conflict resolution.

h. Develop airspace coordinating measures to support planned operations:

(1) Facilitate the commander's concept of operations.

(2) Integrate with fire support coordination measures.

2. The staff publishes airspace control appendix:

a. Direct results of performing above tasks

b. Defines the airspace for which the commander is responsible and the commander's airspace priorities.

c. Evaluate considerations for radar versus non-radar environment as well as airspace control in a degraded network environment.

(Asterisks indicates a leader performance step.)

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. The staff developed the airspace control appendix.			
2. The staff published airspace control appendix.

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 ENVIRONMENTAL-RELATED RISK ASSESSMENT. .

Safety: In a training environment, leaders must perform a risk assessment in accordance with ATP 5-19, Risk Management. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, Multiservice Tactics, Techniques, and Procedures for Nuclear, Biological, and Chemical (NBC) Protection, FM 3-11.5, Multiservice Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Decontamination. .
